Preface

This document is for BriteTest users and contributors who need a guide to the BriteTest documentation and the BriteTest repository layout.

A printer-friendly PDF file for this document is available in `docs/pdf/`,

Document Version History

Document	Runner	Test	Date	Comment	Author/Editor
1.0	1.0.0	1.0.0	2026-06-11	Initial version.	Paul Sinclair

- The **Document** column records the document's version with the format `M.u` (Major, update).
- The **Runner** column records the BriteTest Runner API version current at the time this document version was published and is defined by its `BT_RUNNER_VERSION` macro.
- The **Test** column records the BriteTest Test API version current at the time this document version was published and is defined by its `BT_TEST_VERSION` macro.
- Both Runner and Test use the version format "`M.m.p`" (Major, minor, patch).
- `M` is the same for the Document, Runner, and Test versions.

The document's update version tracks released updates to this document and does not correspond to a minor or patch version. `u` increments when document changes are published in a release without a change to `M`, and it resets to `0` when `M` is incremented.

Table of Contents

1. Introduction	1
2. BriteTest Documents	2
3. BriteTest Repository Layout	3

1. Introduction

The BriteTest documentation consists of documents for:

- **Users:** Public-facing framework and API documents.
- **Contributors:** Guide and API internal documents.

Document types:

- **README:** Introduction or description.
- **Guide:** Usage information.
- **Reference:** Reference companion to a guide.

Document formats:

- **.md:** Markdown documentation format for online viewing.
- **.pdf:** Portable Document Format for printing. A BriteTest .pdf file is generated from a BriteTest .md file using genpdf in the scripts directory of the repository root.

2. BriteTest Documents

The following are the BriteTest user and contributor documents.

User documentation:

- **README.md** — Introduction to BriteTest.
- **BriteTest_Documentation_Guide.md**: A guide to BriteTest documents and the repository layout.
- **BriteTest_Glossary_Reference.md**: An alphabetically ordered list of terms generally used in BriteTest (emphasizing their specific meaning in BriteTest) and terms often used in the testing domain.
- **BriteTest_Runner_Guide.md**: Concepts, usage, and examples for the BriteTest Runner framework and API.
- **BriteTest_Runner_Reference.md**: Reference document for the BriteTest Runner API.
- **BriteTest_Test_Guide.md**: Concepts, usage, and examples for the BriteTest Test API.
- **BriteTest_Test_Reference.md**: Reference document for the BriteTest Test API.

Contributor documentation:

- **README.md**: Directory description, one for each subdirectory.
- **BriteTest_Contributor_Guide.md**: Versioning, documentation/coding guidelines, branching, testing, and CI/release checklists.
- **BriteTest_Runner_Internal_Guide.md**: Implementation concepts, architecture, and high-level design for the Runner API.
- **BriteTest_Runner_Internal_Reference.md**: Reference for the implementation of the Runner API.
- **BriteTest_Test_Internal_Guide.md**: Implementation concepts, architecture, and high-level design for the Test API.
- **BriteTest_Test_Internal_Reference.md**: Reference for the implementation of the Test API.

3. BriteTest Repository Layout

The following shows the layout of the GitHub repository paulsinclair51/BriteTest (core files and directories):

```
.github/workflows/britetest_ci.yml
README.md
LICENSE
.gitignore
Makefile
build_test_britetest.ps1
build/                # Build outputs and related artifacts.
config/               # Repository configuration files.
    markdownlint.json
docs/                 # User and contributor documentation.
    BriteTest_*.md
    pdf/              # Generated BriteTest_*.pdf files.
examples/             # Usage examples.
include/              # Public API .h headers.
    britetest_runner.h
    britetest_test.h
reports/              # Generated report files.
scripts/              # Automation scripts.
    check_directory_readmes.sh
    genpdf
    test_genpdf.sh
src/                  # API .c sources.
    britetest_runner.c
    britetest_test.c
tests/                # Testing assets.
    golden/           # Golden/baseline files for comparison.
    include/          # Test .h headers.
    input/            # Test input files.
    output/           # Captured test outputs to compare against golden/.
    src/              # Test .c source files.
    tmp/              # Temporary test outputs.
```
