\newpage

Preface

This document is intended for LiteTest users and contributors who need quick access to the definitions of terms used in LiteTest or to browse through the terms.

For a list of other LiteTest documents and the LiteTest repository layout, see the LiteTest Documentation Guide.

Document Version History

Document	Runner	Test	Date	Comment	Author/Editor
1.0	1.0.0	1.0.0	2026-06-11	Initial version.	Paul Sinclair

- The **Document** column records the document's version with the format `M.u` (Major, update).
- The **Runner** column records the LiteTest Runner API version current at the time this document version was published and is defined by its `LT_RUNNER_VERSION` macro.
- The **Test** column records the LiteTest Test API version current at the time this document version was published and is defined by its `LT_TEST_VERSION` macro.
- Both Runner and Test use the version format "`M.m.p`" (Major, minor, patch).
- `M` is the same for the Document, Runner, and Test versions.

The document's update version tracks updates to this document and does not correspond to a minor or patch version. u increments whenever this document is updated without a change to M , and it resets to 0 when M is incremented.
